

# BUFFER-W<sup>®</sup>

Concrete Spacers

**RAMKA**  
CONSTRUCTION  
CHEMICALS

**BUFFER-W<sup>®</sup>** BUFFER concrete spacers are supplied in wired and unwired models and are among the commonly used concrete spacers. Foundations and sections exposed to soil or corrosive environments generally require greater concrete cover because reinforcement corrosion risk is higher. BUFFER spacers provide 7.5 cm of concrete cover in foundations and basement walls, helping prevent harmful soil ions from reaching the reinforcement.

## Advantages / Benefits

- Provides suitable cover for foundations and concrete sections exposed to soil.
- Maintains accurate and regular reinforcement spacing to improve structural performance.
- Because it is compatible with concrete, it bonds better and is less likely to separate from the concrete over time.
